

A Postdoctoral Research Associate position is available to help multidisciplinary research projects investigating animal and human enteric viral diseases. The major focus of this position will be to support NIH funded enteric calicivirus research to study host virus interactions and determinants of susceptibility. In addition, participating in other studies including SARS-CoV-2, novel animal enteric viruses and in collaborative projects on food safety is also possible. The laboratory is located at the Department of Veterinary Pathobiology, College of Veterinary Medicine and Biomedical Sciences, Texas A&M University in College Station, Texas.

Candidates with a strong background in virology, molecular biology and/or cell biology are encouraged to apply. Candidates should have excellent research skills and the ability to work independently and as part of a team.

To apply, please send curriculum vitae with a list of publications, a brief description of research experience, and the names and contact information of three references to: tfarkas@cvm.tamu.edu

Salary: Commensurate with experience.

The Texas A&M College of Veterinary Medicine & Biomedical Sciences (CVM) is an institution that represents 100 years of growth from a small school of veterinary medicine in 1916 to its present role as a major veterinary educational, medical, and research center. Today, we are one of the largest colleges of veterinary medicine in the United States, training nearly 600 Doctor of Veterinary Medicine students each year. We support collaboration and teamwork that turns today's discoveries into proactive solutions for animals, humans, and the environment. Together, we strive to support the goals of the faculty, staff and students in teaching, research and outreach programs. To learn more, please visit our website <https://vetmed.tamu.edu/>
